User Stories

User Story 1: As a new user I want to create an account with the workout tracker app by setting up a profile.

Description: After downloading the app the user will be shown the login page. The user can log in using a third-party authentication such as Google, Facebook, etc.. Once the user logs in the app will be able to recognize if the user is an existing user or not. If the user is new then they will be directed to set up a new profile. The user will be prompted to enter the following information: First Name, Last Name, Birthday, City, State, Weight, Height. The user's profile will be successfully created and stored once the user clicks "Create Profile." If the user is an existing one then they will be taken to the app's home page.
